## CONSTITUTIONAL AMENDMENTS

### Five To Be Voted On At Special Election On Sept. 10

The people of Maine will pass upon five proposed constitutional amendments at a special election which will be held on the second Monday of September, and the Department of State will furnish the first copy to the printer for the ballots early the coming week. Approximately 400,000 ballots will be printed and under the law 60 ballots are furnished for every 50 votes or fraction thereof cast at the preceding gubernatorial election. The law stipulates that the Department of State shall send one set of ballots to be received by the city, town or plantation clerk 72 hours before election day and duplicate set to be received by the clerk 48 hours before election day.

#### Will Soldiers Vote?

The question as to whether Maine's soldiers in the war with Germany shall vote on the amendments has been referred to Attorney General Guy H. Sturgis of Portland for an opinion. There seems to be some doubt as to whether the soldiers will be permitted to vote on constitutional questions, whereas if it were a state or a national election there appears to be no question but that they must be allowed to cast their ballots. The last general state election occurred when the members of the Second Maine Regiment Infantry were doing outpost duty on the Mexican frontier, and they voted at that time. Of course no one knows where the Second Maine will be on election day, but the impression has been of late that the regiment will not be moved South until the first of October.

#### Amendment to Women.

The amendment to the constitution granting suffrage to women on equal terms with men reads as follows: "The right to vote or to hold office shall not be denied or abridged on account of sex; provided, however, that citizens by marriage only shall not be allowed to vote or hold office until after a period of residence in the United States equal to that required by law for the naturalization of men in this state. In the construction of this constitution the masculine pronoun shall be construed as meaning both men and women."

#### Removal of Sheriff.

The resolve proposing an amendment to the constitution relative to the tenure of the office of sheriff reads as follows: "Whenever the governor and council upon complaint, due notice and hearing shall find that a sheriff is not faithfully or efficiently performing any duty imposed on him by law, the governor may remove such sheriff from office and with the advice and consent of the council appoint another sheriff in his place for the remainder of the term for which such removed sheriff was elected. All vacancies in the office of sheriff, other than those caused by removal in the manner aforesaid, shall be filled in the same manner as judges."

Continued on page 5.

## CANNING DEMONSTRATION IN BETHEL, AUGUST 8.

The Extension Service of the University of Maine has arranged for a meeting in the interests of food conservation in every town in the State of Maine. The meeting in this town will be held at 2 P. M., Wednesday, Aug. 8, in Orange Hall. Methods of food preservation will be demonstrated and explained by women trained for this kind of work. It is hoped that every woman will make a special effort to be present and it is requested that she bring pencil and note book.

LEON S. MERRILL,

Director of Extension Service.

The women of Bethel now have the opportunity to "do their bit" in helping to solve the food problem. There are acres of good gardens which will yield abundantly. Let us get together and learn the best ways of preserving these products. Please be on hand promptly at 2 P. M., at the afternoon session, so that we can get all we want to learn.

Mrs. Chas. Lyen, Chairman,  
Mrs. D. O. Lovejoy,  
Mrs. Herman Mason,  
Mrs. Henry Austin,  
Mrs. O. M. Mason.

Local Committee.

## GRANGE NEWS

**PLEASANT VALLEY GRANGE.**  
Pleasant Valley Grange, No. 136, held its regular meeting Tuesday evening, July 24, with thirty-two members and one visitor present. Officers present: Treasurer, Gate Keeper. The first and second degrees were conferred on four candidates. The literary program consisted of a paper composed and read by Mrs. Bertha Mundt. Grange closed in form.

**ALDER RIVER GRANGE.**  
Alder River Grange held its regular meeting Wednesday evening, July 25. Executive officers: Lecturer, Miss Edna Bartlett; Pomona, Mrs. Saddle Burhoe. The third and fourth degrees were conferred on one candidate. Refreshments of delicious ice cream, assorted cake and cookies were served under the management of Mrs. Helen Hutchins. Mrs. Edna Bartlett and Ceylon Kimball. Next meeting will be held August 8th.

**NORWAY GRANGE.**  
Norway Grange met at their hall July 28. Owing to the busy season but a few were present. Owing to the enforced absence of the Worthy Master and Overseer, the Lecturer, Mrs. A. E. K. Grover, called to order and conducted a short session. Several questions pertaining to the business of the Grange were discussed and will be presented later for final action. Owing to lateness of the hour, the program was omitted and the meeting closed in form.

The next meeting will be Matron's Day, and will be held on Aug. 11, the Sisters to occupy the chairs.

Program for August 11:

Opening Song, Grange Melodies, Page 28.

Song, selected, Minnie Haskell.

Reading, Lizzie Millett.

Piano selection, Mary Gammon.

Sketches of successful lives, Zilpha Prince, Mand McCoster, Mrs. Dinna Moore, Adelaide Young, Algie Crocker.

Song, selected, Eva Jackson.

Paper, Addie Thurston.

Clippings from other Grange reports, Alice Gammon, Mary Perry, Mrs. Upton, Lucella Merriam.

Music feature, in charge of Minnie Upton.

Quotations pertaining to farm life and nature by all.

Questions: "Should the Brothers be allowed to take part in the literary exercises on Matron's Day?" Discussion opened by Hattie Brown followed by Harriet Buck, Lois Jackson, Fannie Richardson, Emma Towne, Viola Abbott. To be decided by vote.

A talk, Carrie A. Roberts.

Special feature, in charge of Lella Watson, Viola Abbott, Emma Cullinan.

Paper, Isie Cox.

Piano selection, Gertrude Dunn.

Instructive talk on ritualistic work, Isie Cox, Harriet Buck, and others.

Closing song, selected by Chorister.

Additional features and suggestions always gladly welcomed.

The Girls' Canning Club held a successful food sale at the hall July 28, in charge of Minnie Upton, leader.

**WEST PARIS GRANGE.**

The regular meeting of West Paris Grange will be on the fourth Saturday evening, in September, meetings will be held at the usual time.

Committee for exhibit at Oxford County Fair have been appointed as follows:

General Committee—Mrs. and Mrs. Dana A. Grover, Mr. and Mrs. Charles Stevens.

Fruit—R. L. Cummings, P. L. Wyman, Chas. Dudley, Harold Porter, Leo Littlelake.

Vegetables—A. J. Abbott, I. H. Edgewood, Geo. Stone, Chas. Marshall, Harold Perkins, Alfred Andrews.

Dairy Products and Eggs—Mrs. Geo. Stone, A. R. Taell, Steuben Taell, Mrs. O. L. Peabody, Mrs. Frank Littlelake, Rags, Quinn, Karl Good—Mrs. A. B. Taell, Mrs. A. D. Littlelake, Mrs. Elmer Hammond, Mrs. M. D. Fox, Miss Edith Bradford.

Fancy Work—Laura Barlow, Mrs. Ed. Mann, Mrs. D. A. Ball, Mrs. Mary Stetson, Mrs. C. L. Riddle.

Flowers and Plants—Mrs. W. W. Dunham, Mrs. E. F. Barrows, Mrs. A. J. Abbott, Mrs. Chas. Reed, Mrs. S. Cole.

Grains and Grasses—Clayton Church, H. Mrs. Baker, Vera Stone, Wilma Littlelake, Mrs. I. H. Edgewood.

Jellies and Canned Goods—Mrs. Geo. Stone, Mrs. G. W. Berry, Mrs. J. L. Porter, Mrs. Mabel Herriek, Holly Taell.

## MOTOR VEHICLE LIGHTS

### Dimmers Must Be Used After August 15

The following rules and regulations governing the use and operation of headlights on motor vehicles used on public highways in the State of Maine have been adopted:

After August 15, 1917, no motor vehicle shall be operated on or along any highway or other way between the hours of one hour after sunset and one hour before sunrise unless the headlights on any such motor vehicle are constructed and operated as follows, viz:

(1) No bulb or lamp used in any such headlight shall be of greater candle power than 24 (or equivalent wattage).

(2) The lens of glass in the front part of any such light, (if the lens be of plain glass) shall be sandblasted or frosted on the inside so that no direct or reflected ray from said light shall be, on a level road and seventy-five (75) feet ahead of any such motor vehicle, more than forty-two (42) inches from the ground. Paint or Bon Am sufficient to prevent glare, may be used temporarily.

Note: Experiments have shown that this result may be accomplished by sandblasting or frosting the lens on a level line down to a point one (1) inch below the center of the lamp bulb. No clear glass should be left above this line. Some lamps are hung lower on some cars than on others and care, by experiment, should be taken to see that the direct or reflected rays are not higher than the above-named forty-two (42) inches.

(3) In case a "Fracto" or similar device is used, sandblasting or frosting is unnecessary, but great care must be used in focusing the light as improper focusing will throw the rays upward and produce the unlawful glare.

(4) Persons using lenses so constructed that no glaring rays are supposed to be produced (the Warner, Legalight and others being types) are not required to sandblast or frost such lenses; but strict regard must be had to the 24-candle power limit of bulbs as higher candle power produces the dangerous glare from any such lens.

(5) Any light may be "dimmed" in cities and villages where street lights exist and are burning not over five hundred (500) feet apart.

(6) No spotlight shall be used on any motor vehicle except for the purpose of casting a light to the right or left or the rear of a car and then only where the car is stationary or at slow speed or in reverse. When any motor vehicle has been under headway, the spotlight shall be turned entirely out and under no circumstances shall be turned toward any approaching vehicle.

Note: A committee representing the Maine Automobile Association and the Maine Automobile Dealers' Association recommends the barring of the use of "spotlights" so called. As used by many motorists, this light embraces all the dangers and annoyances of an unprotected headlight. It has, however, its legitimate uses, among which are the searching out of signs, boards, the observations on the driving side of the car made to avoid ditches or see where the rear wheels are going while the car is backing. It may also be used to cast a light under the hood in making repairs to or other operations of the engine. Fearing that it may at present be unfair to "bar" the spot light, we make for the present the above regulation giving notice that if these lights are improperly used, they will be entirely barred.

(7) To avoid misunderstanding, let it be understood that all these regulations apply to motor cycles.

Choked Food—Mrs. C. P. Bardeen, Mrs. W. H. Lurvey, Mrs. Elroy R. Davis, Mrs. C. A. Church, Mrs. H. Welch.

Transpiration—D. A. Ball, C. H. Lane, Jr., E. W. Peasey, M. Babier, W. C. Rogers, A. E. Marshall, E. L. Porter, A. R. Taell.

**LOST.**  
Between Bethel, N. H., and Bethel, Me., on June twenty last, a pair of shell rimmed, light amber tinted glasses in large black case. One dollar reward for return to

CARROLL K. VALENTINE.

Bethel, Maine.

## CHURCH ACTIVITIES

### CONGREGATIONAL CHURCH.

Sunday morning worship at 10.45. Theme of sermon, "The Abiding Presence."

Christian Endeavor meeting Sunday evening at 7.00 o'clock. Topic, "How Men Cheat Themselves." Miss Marion Mansfield leader.

Mid-week service Tuesday evening at 7.30. Topic, "The Watered Garden."

Choir rehearsal Friday evening at Garland Chapel at 8 o'clock.

The Ladies' Club will meet with Mrs. Purinton, Thursday afternoon at three o'clock.

### METHODIST CHURCH.

Last Sunday services were well attended both morning and evening.

Next Sunday morning service at 10.45. The sermon will be the fourth in the series on the subject, "The trial of faith and the reward of faith."

Sunday school at 12.00. Men's class meeting in the large room down stairs. Women's class in the vestry.

Junior Epworth League at 3.00. Epworth League at 7.00 in the vestry.

Evening service at 7.30, short sermon by the pastor.

Class meeting, Tuesday night, 7.30. The entertainment to be given in the Grange Hall, Thursday evening at 8.15 promises well with "The Baby Show" by the children, and "Sewing for the Heavens" by members of the Ladies' Aid. Following are the names of those taking part: Mrs. Annas, Hostess; Mrs. Kendall, President of the Society; Mrs. Millie Clark, the Stranger, mistaken for a dressmaker; Carrie Arno, Grandma, deaf but persistent; Mrs. Wheeler, so sentimental; Mrs. Alice Jordan, a suffragist; Mrs. Lillian Stowell, gentle and good; Mrs. Purinton, a bride of a few weeks; Mrs. Garay, as Meely the hired girl. Admission 20 cents.

### UNIVERSALIST CHURCH.

All Sunday services at this church will be omitted through August.

The pastor, Rev. J. H. Little, has gone to his cottage at South Freeport, which will be his post office address till September. Telephone call, "Jones and Houston's Store," South Freeport.

The Universalist fair last Wednesday afternoon was a success, notwithstanding the heat. Mrs. Nellie Davis and Mrs. Howe exhibited a very nice lot of fancy articles, bags, crochet work, etc. Mrs. M. L. Thurston and Mrs. Edwards presided at the apron table and sold a variety of aprons and towels. The ice cream parlor with Marie Park and Dorothy Hutchins presiding was well patronized.

The long supper tables were well filled with people and were beautifully decorated with flowers and flags. The sum realized was over \$100 for church expenses.

### TEAGUE—MORRIS.

John E. Teague of Turner and Eliza both Mary Morris of Livermore were at Rev. J. H. Little's, Thursday, July 26, and were united in marriage by Rev. Mr. Little, using the single ring service. They were former parishioners of Mr. Little when he was pastor at Canton and Livermore.

### BROWN—COLE.

Ira A. Brown of Hancock and Miriam F. Cole of Lowell, Mass., were married in Bethel, July 28 by Rev. J. H. Little, at his residence. It was the single ring service. Mr. William Chase of Hancock accompanied them.

### NOTICE.

Beginning Saturday, June 16, the Citizen office will be closed Saturday afternoons during the summer.

### BERRY PICKERS WANTED.

25 1-2% Increase in Prices Paid. I have fifteen acres of cultivated raspberries to be picked in August and the prospect is that the crop will be the heaviest for many years. I expect to get at least fifty thousand baskets and am prepared to take care of several thousand more.

I shall need a very large number of pickers about August 10th. Berries are very late this season. Nearly three weeks later than usual.

I can board about thirty-five at the farm house. Board furnished at \$2.50 per week. I will give a discount of \$1.00 per week on the board bill to all good pickers who stay until the picking season is over. This will make the board cost only \$1.50 per week and the price paid for picking will be 25¢ per pint instead of 15¢ per pint basket, the price I have paid for many years.

H. F. MAXIM,  
Locke's Mills, Maine.

CITIZEN OFFICE.

## BETHEL INN

### Happenings of the Week

Mr. William Bingham, 2nd, is at Christmas Cove for a short vacation.

Mrs. George H. Shattuck, son and daughter, of Topsfield, Mass., arrived at the Inn on the 20th.

Mr. and Mrs. W. D. Guthrie of New York are visiting Mrs. Guthrie's brother, Mr. William Fuller.

Mrs. E. M. Shaw of Nashua, N. H., is visiting her daughter, Mrs. A. E. Libbey, for a week at the Inn.

The orchestra which is playing at the Inn during the summer, is greatly appreciated by the guests and their friends.

Mr. and Mrs. Longbotham and Mr. and Mrs. Charles Clarks, Jr., motored from Glen Ridge, N. J., arriving at the Inn on the 25th.

Mr. and Mrs. A. Whitman, Fort Chester, N. Y., and Mr. J. W. Leet, of New York City were overnight guests at the Inn on the 31st.

Mr. and Mrs. E. E. Johnson and Mr. and Mrs. A. A. Vase and Chas. A. Vase arrived at the Inn on the 26th, having motored from Oklahoma City, Oklahoma.

The extreme heat has driven more people from the cities and the Inn has had her share the past week, filling the main house and many having to be accommodated at the Elm Cottage, as well as the Willows.

Dr. W. E. Russ and Dr. J. C. Carter of Indianapolis arrived at the Inn on the 27th, having covered the distance in a "Saxon." They are on an extended sightseeing and fishing trip, and when they return home expect to be drafted into the army.

Mr. Paul P. Sulphon and wife and Miss Sulphon from Cleveland, Ohio were at the Inn on the 27th, coming here from Christmas Cove, where they had visited Dr. and Mrs. Gehring. Mr. Sulphon's daughter is the wife of Dr. Farnsworth, who is the son of Mrs. Gehring.

Mr. and Mrs. S. W. Philbrick and sons of Skowhegan, Me., were overnight guests at the Inn on the 25th. They were motoring to Plattsburg, where they have a son in camp. After visiting there they hope to return to the Inn as they found it the most attractive place they had visited.

Mrs. Marion H. Gates and Mrs. D. T. Whipple of Kansas City, Mo., spent a short time at the Inn. This is the third visit of Mrs. Gates who has a summer home at Pratts Neck. She is very much in love with Bethel and the Inn, and is contemplating spending a winter here with her family, as her husband has been called for military duty.

### LOW PRICED FARM WANTED.

I am looking for a farm costing between \$500 and \$1,200. Do not object to going 5 or 7 miles from a good town. Address

BARGAIN, Box 614,

Norway, Maine.

7-25-17.

## HAVING A PLEASANT VACATION.

Alan Pressley Wilson.

Where will you spend your vacation this summer? Have you planned where you will go and the route you will take? As a rule, country and city people exchange vacation spots; the city people get out into the country and the country people go to the city. In each case, there is a change of environment, which, after all, is the true object of a vacation. This change of environment is what rests us and fits us for the duties we cannot now perform because our systems are depleted of energy and vitality. The chief objection to the annual vacation trips is the fact that one usually spends more money than his plans call for. This necessitates returning home sooner than at first intended doing without some things you really want and need, or, carrying a heavy load. A person who is wise goes to some quiet place, spends but a portion of his vacation money and returns home in better health and frame of mind. This saving of vacation money may then be turned to good account and put aside for the future. If, however, the coming of summer finds you unprepared to take a vacation trip, let me urge upon you the necessity of putting away, each week a portion of your earnings. Do this religiously, and you will be surprised to see what a nice sum of money you have saved. Any savings bank will gladly accept a vacation bank account for you and help you to save by their encouragement.

Baltimore, Md.

## BETWEEN VACATIONS.

The month of August is the time when every one who can, will take a vacation. Nearly all the nooks and corners of America have been hunted out and turned into resorts. Into these places those who are fatigued by confinement, work, and worry will be taking themselves, with the expectation of gaining rest and recuperation. Some will get mental rest and physical recreation others will get none at all, but only an additional wear-down of a different sort. Now is the time to live in such a manner that, when vacation comes, it may give one a joyous outing instead of an invalid's search for sleep and a healthy appetite. The philosophy of rest we have hardly begun to comprehend. An eminent physician some time ago said that he valued preventive medicine for men far more than medicine to counteract a breakdown. His rule is, "Lep off outlying affairs; leave a margin of strength; avoid a rut; cultivate a healthful hobby; take vacations and sleep; avoid excess in tobacco and drink; and a breakdown is not necessary, even to the most strenuous man." There is a great deal of common sense bottled down in this prescription. What we want is not so much vacations as moderation. If a man will live modestly, he will accomplish more in the long run than by intemperance. But he must understand that intemperance can go into vacation with him, as well as into his work. Some people imagine that a fierce application to games is going to undo a fierce application to work. It works along exactly the same line. The common method of living has been described as "The delicious style of doing business." Anyone who goes himself "keyed up" is using a good deal more vital force in his work than is necessary. High pressure is a most never necessary, and generally accomplishes poorer work, and less of it, year by year, or even day by day.

Learning how to work is like learning how to study, and the two ought to constitute a very large part of education in the earlier part of life. No one ought to be admitted into college without being taught how to make the best use of time and strength, and to accomplish the most without physical injury. An educator says, "I am willing to do more and more that education does not consist in the amount that a youngster shall learn, or even shall observe, but in the rhythm which is secured between knowledge and health. The young fellow should study and investigate in just that way that will best develop his body and mind powers, and never weaken them. True education has nothing whatever to do with those examinations which drive boys and girls to disorganized and nerve-racking use of books and facts." We must be careful about what ideas we convey to our children in life. The young person is likely to magnify the importance of what we call schooling.

He gets into harness, and grunts irritably when he lays his harness off. This will lead to rebellion by and by, and to disgust for business, if not for life. As we adjust work to common sense and fit it to our power, it becomes

## CLEANING UP.

Upon taking up the duties of my office the first of February, one of the first things done was to make a survey for San Jose Scale. Infestations were found in Cornish, Eliot, Lewiston, Limington, Norwary, and Wilton. All of these places have been personally visited and stringent measures taken, with a determination, if possible to eradicate this pest, which is one of the worst we have in this State today. The life history and remedy for this pest may be found in our insect bulletin.

Two bad infestations have been taken care of by cutting and burning. We have found three new infestations of San Jose Scale in the state this summer: One in Norwary, one in Hallowell and one in Cornish, the first two coming from the same nursery. The agents working for this firm are liable to have their license revoked if it continues to ship infested stock into this state. In Hallowell, a bank on Water Street, which was covered for a long distance with black knot, oyster shell and scurfy scale was cleaned up. In Belfast, a large amount of black knot, oyster shell and scurfy scale, as well as European scale has been destroyed.

This work has been continued in Augusta, Manchester, Winthrop, Lewiston, Greene, and in other places too numerous to mention. Woolly aphis was also found in Augusta and directions given for its destruction.

Where any of the above are found, requests, and, if necessary, demands are made for their destruction, either by spraying or by cutting and burning. The law concerning this is as follows:

Revised Statutes of 1910, Chapter 39, Section 4: "The state horticulturist, either personally or through competent assistants, may inspect any orchard, field, garden or roadside in public or private grounds, which he or they may know or have reason to suspect to be infested with the San Jose scale or any serious pest or infectious disease, when in his or her judgment such pests or infectious diseases are a menace to adjoining owners; and the state horticulturist may in writing order the owner, occupant or person in charge thereof to properly spray or give other suitable treatment, or to cut and destroy any such diseased trees or shrubs. If in the opinion of the state horticulturist such action is necessary. If the owner of such orchard, field or garden neglects or refuses to comply with such written order, he shall be fined not less than ten, nor more than fifty dollars for each offense."

We are constantly on the alert for nursery stock infested with diseases as well as stock infested with insect pests, as was shown by the treatment which was given to a car of fruit trees that was recently shipped into Augusta. The stock was condemned and burned as it was covered with crown gall and hairy root. A bulletin on these diseases, with a picture of some of the roots of the condemned trees, will soon be ready for free distribution to fruit growers.

Specimens of insects and diseases have been sent to the office, among which are the following: The parasitic red humped caterpillar which is very destructive when the parasite, *Limonix Guignardi*, is not present; a sawfly, *Doryphora olivacea*, resembling somewhat the potato beetle; a moth of the Fall March Caterpillar, which is somewhat destructive against the margins of Boston; also several specimens of spider shell scale.

We pay close attention to any and all specimens mailed or brought in, and are ever ready with information concerning the same.

Frank H. Dudley,  
State Horticulturist.

## CANTON

Miss Hazel Gilbert of Lewiston is visiting her parents Mr. and Mrs. W. B. Gilbert and family.

Mr. and Mrs. J. K. Forhan have returned home.

Mr. and Mrs. B. H. Redden of Mattapan, Mass., are guests of Mr. and Mrs. Frank M. Oliver.

Mellen B. Packard is visiting his daughter, Mrs. Thompson A. Potter, and family of Woodford.

R. G. House and family of North Turner and Mr. and Mrs. Ernest Harmon of Portland have been guests of Mr. and Mrs. G. E. Towle.

Oscar E. Hardy and children, Robert and Alice, visited Mrs. Hardy at Dr. Cousin's hospital in Portland, Sunday.

Mrs. Walker G. Morse and two children of Rumford have been guests of Miss Clara M. Barrows.

Mrs. Ralph Fuller and child, who have been spending some time with her mother, Mrs. Cora B. Fuller, have returned to their home in Massachusetts. Mr. and Mrs. Geo. W. Carson have been on a visit to Readfield.

Quite a number of Canton people spent Sunday at Lake Umbagog.

Burglars visited Canton Thursday night, entering the hardware store of G. L. Wadlin and taking two watches and some small change. They also broke into the grist mill of Geo. W. Carson and secured \$12 from the money drawer. The culprits were found and arrested by Deputy Sheriff Geo. Barrows. They were taken to Rumford, a trial held, and bound over for the October term at Paris. They were taken to Paris jail Saturday evening. They gave their names as Harry J. Emerson and Harry G. Barnham of Kennebogan, both being young lads.

In a recent thunder shower lightning struck the ridgepole of G. W. Carson's grist mill but did little damage. A post card shower will be sent to Mrs. Oscar Hardy at Dr. Cousin's hospital, Portland, Aug. 31st, her birthday being on Sunday, August 31st.

Mrs. Mattie Williams has been spending a couple of days at East Dixfield. The funeral of Leonard Kilbreth was held Wednesday at one o'clock at the Canton Universalist church, Rev. Eleanor B. Forbes officiating. The floral offerings were very beautiful and included a piece from the Relief Corps. Vocal solos were rendered by Mrs. Gladys White Russell. Many relatives and friends attended the funeral. The interment was at Pine Woods cemetery.

A large number of Canton ladies attended the canning demonstration held at the Red Cross rooms Tuesday afternoon, the demonstrators being a lady sent out from the U. of M. The meeting was very helpful and much interest was taken in the new methods.

A lawn party will be held at the home of Miss Clara M. Barrows, Tuesday night of this week, when games, entertainment and ice cream will be served. The affair will be under the auspices of the Relief Corps and the proceeds will be used to buy knitting material for making articles for the navy department.

A post card shower will be sent this week to Ralph W. Blanchard who has enlisted in the Ambulance Corps, No. 33, stationed at Allentown, Pa.

Mr. and Mrs. Henry Drake of Melrose, Mass., are guests of Mrs. Frank McCorney.

Miss Madeline Hines is ill with an attack of appendicitis.

Carroll Thompson and family of Farmington have been guests of his sister, Mrs. Bernard L. Patterson and family.

Miss Margarette Hollis, who has been attending a summer school in music at Lowell Seminary, Auburndale, Mass., has returned home.

Mrs. Ella Merrill and Mrs. Susie Collins of Farmington were Sunday guests of Chas. F. Oldham and family.

Albert Lavergne, who has enlisted in the Regular Army and in the National Guard of the States;

Sent a Commission to Russia to aid Democracy there and a body of railroad men to Russia and another to France to advise and assist in railroad transportation in those countries;

Began the construction of 28 camps for our soldiers;

Sent to England a fleet of destroyers and to France a detachment of troops;

Authorized and now enforcing embargo whereby our enemies will receive no more food or material from us;

Passed a food conservation law;

Organized many voluntary commissions and boards who are aiding the Government and the people in the speeding up of work, conservation of food, and other national movements;

Drafted by lot 637,000 men for military service;

While the Government was accomplishing these things the American people have loaned the United States \$2,000,000,000 and offered \$1,000,000,000 more, over four million citizens, contributing to the loan.

In addition they have given over \$100,000,000 to the American Red Cross and \$50,000,000 to the Young Men's Christian Association.

## AMERICAN EFFICIENCY.

Germany efficiency has been held up as a degree of excellence unattainable by a Democracy. The accomplishments of the United States since April 6th last refute the truth of the claim. In the short space of time since that day the United States has accomplished the following:

Declared a state of war as existing between this country and Germany;

Seized 91 German ships and begun repair work on them;

Authorized unanimously a war fund of \$7,000,000,000;

Appropriated \$600,000,000 for merchant shipping and as much for aircraft;

Agreed to loan our Allies \$2,000,000,000 and advanced them a large proportion of that sum;

Passed a selective draft law and in a single day registered nearly ten million men for military service;

Mobilized 600,000 volunteer soldiers in the Regular Army and in the National Guard of the States;

Sent a Commission to Russia to aid Democracy there and a body of railroad men to Russia and another to France to advise and assist in railroad transportation in those countries;

Began the construction of 28 camps for our soldiers;

Sent to England a fleet of destroyers and to France a detachment of troops;

Authorized and now enforcing embargo whereby our enemies will receive no more food or material from us;

Passed a food conservation law;

Organized many voluntary commissions and boards who are aiding the Government and the people in the speeding up of work, conservation of food, and other national movements;

Drafted by lot 637,000 men for military service;

While the Government was accomplishing these things the American people have loaned the United States \$2,000,000,000 and offered \$1,000,000,000 more, over four million citizens, contributing to the loan.

In addition they have given over \$100,000,000 to the American Red Cross and \$50,000,000 to the Young Men's Christian Association.

All these things were accomplished while our soil was not invaded or even threatened with invasion and without any disturbance of business conditions. All was done with the calm determination and judgment of an earnest, patriotic people performing a service for civilization and mankind and maintaining the rights, the dignity, and the honor of the greatest nation in the world.

The German leaders derided America's entry into the war as a bluff. This is our answer.

The German Imperial Government was nearly fifty years in perfecting its military efficiency. In less than four months the American Republic has made such strides as to indicate that in less than two years' time the boasted superiority of German efficiency will have been discredited. There is such a thing as American efficiency, and time will prove that German efficiency can not withstand it, fighting as it is for liberty, justice, and humanity.

## LOCKE'S MILLS.

Mr. and Mrs. Thelma of Beachmont, Mass., were guests of their cousins, Mr. and Mrs. Frank Reed last week.

#### KEEP OLD FRAMES IN USE.

These Devices Prolong the Period for Production of Early Spring Vegetables.

Hardened too often, waste the producing power of the soil, well filled and of cold frames after early started crops have been removed and set in the garden, say specialists of the United States Department of Agriculture.

It should be recognized, the special use point out, that most of the garden crops of the early spring which are usually set in cold frames, are not at all adapted to the open after dry hot weather sets in, and the ground sets fairly at such a time in cold frames. Among such vegetables are lettuce, radishes, and early beets. All these plants thrive best under cool, fairly moist conditions. The sides of the cold frames furnish a partial shade and a good protection from drying winds and so help to maintain coolness (and in the spring in the open if it is desired, this speeded up and out of the way by the time the space is needed for lettuce, if planted there the surplus lettuce should be removed.

Lettuce and radish seed may be planted together in the frames. The radishes will mature first and will be out of the way by the time the space is needed for lettuce. If planted there the surplus lettuce should be removed.

#### "Safety First" For Automobile Owners.

MR. CAR OWNER—

Now that you are thinking about how soon you can get your car out for the 1917 season is the time for you to think about placing insurance for that car.

**PROTECT YOURSELF AGAINST LOSS** of your car by FIRE, LIGHTNING & THEFT. Our policies cover the car at all times wherever it may be, on the road, or in any building in this country or abroad.

**PROTECT YOURSELF** against possible suits for personal injury, damage to property of others, and damage to your own car by collision, by a LIABILITY, PROPERTY DAMAGE, and COLLISION policy.

**WE HAVE THE COMPANIES! THEY ARE THE BEST** YOU HAVE THE CAR, AND YOURS IS THE LIABILITY. WE'LL RELIEVE YOU OF THE LIABILITY, and it won't be necessary for you to turn the car in to pay the premium either. THE RATES ARE REASONABLE.

Write or phone, giving make of car, model year, number, and purposes for which car is used, and we will gladly quote you rates.

DO IT NOW.

## Now For Dollar Day August 11

It will only cost you one dollar to try our work and get either one portrait 8x10 or one cabinet folder or three half cabinet folders.

This is a big offer and much less than our regular price.

Besides we are making a reduced price on dozen orders, crayons, small copies, or any kind of portrait work that we make.

**THE COTTAGE STUDIO** NORWAY, MAINE

Mrs. Edwin Gehring and children of Portland are visiting her parents, Mr. and Mrs. E. C. Chamberlain. Dr. Edwin Gehring spent Sunday with them.

Evelyn Chandler went to Norway, Saturday, and attended two sessions of the Community Chautauque. It is a rare opportunity to hear the very best talent and the tent was packed Sunday afternoon with an appreciative audience.

Supt. and Mrs. F. H. Byram of Freeport arrived in Bethel, Monday, and are spending a few days at Maple Inn. Mr. Byram has accepted the superintendency of the Yarmouth-Freeport district. Mr. and Mrs. Byram made many friends during their stay in Bethel who will be sorry to hear that they are not to return this fall.

Mrs. Winnie Bartlett entertained the Ladies' Club, July 19th. Twenty-one members were taken by auto to the pleasant farm house of the Bartletts where everything had been prepared for a day's outing. The forenoon was spent by the ladies in sewing a little and admiring their surroundings more. Tables were spread under the trees and most bountifully supplied with tempting viands and the noon hour was happily supplied with satisfying the appetite of the company and conversed with kindly friends. After dinner the following program was given: Quotations; recitation, "The Christmas time," Miss Shirley Russell; recitation, "Papa's Letter" and "Our Flag," Mrs. David Foster. Vocal solos were rendered by Mrs. Bartlett and all then joined in familiar songs and hymns with Mrs. Bartlett accompanying. When the Club adjourned it was with many thanks to the Bartletts for royal hospitality and all brought home pleasant memories of this Red Letter Day.

Mr. and Mrs. G. C. Russell, who have been in New York State, are visiting their daughter, Mrs. Nathan P. Israelson.

Mr. and Mrs. Jack May of Upperton street are receiving congratulations on the birth of a son.

Mrs. J. K. McKenzie and daughter, Margaret, of Knox street are enjoying an outing at Ferry Beach.

Rev. Ralph F. Lown and family are spending a few weeks at Kittery Point.

Miss Grace Swain of New York City and Mrs. Eva Simpson of Chicago are the guests of their parents, Mr. and Mrs. Roscoe E. Swain, of Knox street.

Mr. and Mrs. Arthur Hinds and children of Strathglass Park are enjoying a vacation with Mr. Hinds' parents at Livermore Falls.

Rev. Allen Brown left this week for Waltham, N. H., where he will spend a month.

The Sunday School of the Virginia Memorial Chapel has closed until September.

## Building Material

Do not think that prices on all kinds of building material have been advanced. Fortunately we had a large stock of material before prices commenced to leap and we are giving our customers the advantage in these items. For instance:

|                             |                             |
|-----------------------------|-----------------------------|
| 12-16 Yellow Pine Flooring, | \$35.00 to \$55.00          |
| 12-16 Hardwood Flooring,    | \$50.00 to \$60.00          |
| 12-16 Novelty Siding,       | \$20.00                     |
| Roofing,                    | \$1.25 to \$1.75 per square |

While doors and windows are higher we are below market price.

Our stock of Mouldings is complete at old prices.

Packing and Trucking free.

**CHAS. G. BLAKE**

Rev. Allen Brown left this week for Wolfboro, N. H., where he will spend a month.

The Sunday School of the Virginia Memorial Chapel has closed until September.

## A POPULAR VERDICT

## Based on Evidence of Bethel People

Grateful thousands tell it—Of weak backs made strong—Of weak kidneys made well—Urinary disorders corrected.

Bethel people add their testimony. They praise Doan's Kidney Pills. Bethel evidence is now complete.

Bethel testimony is confirmed. Reports of early relief substantiated. Merit doubly proved by test of time. Let a Bethel citizen speak.

C. H. Heath, carpenter, High St., says: "I suffered terribly from backache, headaches and dizzy spells. The kidney secretions were irregular in passage, being entirely too frequent. I got Doan's Kidney Pills at Rosserman's Drug Store, and in a few weeks I was entirely cured." (Statement given July 20, 1911.)

On June 8, 1916, Mr. Heath said: "I am still a firm believer in Doan's Kidney Pills. I use them as I feel in need of them and they always bring me good results as when I first took them."

Price 60c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Heath had. Foster-McMillan Co., Mfgs., Buffalo, N. Y.

Mr. and Mrs. Martin L. Griffin of Baldwin Terrace, with their house guest, Miss Henrietta Palmer of Blenheim, N. Y., left this week by auto for Albany, N. Y.

Miss Abbie Perry, who has been employed by the Oxford Printing Company for the past eight years, has resigned her position, and will enjoy a well deserved rest. She will spend the month of August at Camp Ellis and Old Orchard Beach.

The Rumford-Anchorage stage line has been taken over by Warren and Richards from Mr. P. A. Lovejoy who has conducted the route for the past sixteen years. Mr. Lovejoy has seen many changes in the mail route in his long years of service.

Rumford boys, living in the business section of the town known as the "Island" are preparing a petition to present to the selectmen asking that a public swimming pool be established. The boys claim that almost every community the size of Rumford has its public bathing place.

Miss Adah Farnsworth, former District Nurse of this town, who has now become a Red Cross nurse, and is with others to Newport, R. I., writes that she is enjoying life exceedingly, the work assigned to her for the present being the work necessary to be known.

Miss Mary Morse, a former teacher in the Bethel school, and the fiancée of Mr. Henry Briggs is in town the guest of Mr. and Mrs. George Pettigall of Pine street.

Dr. and Mrs. Charles M. Dickey of Franklin street have left for their summer home at Oquossoc on the shores of Rangely Lake, where they will make an indefinite stay.

Madame Mosher of Oakland is the guest of her son and wife, Mr. and Mrs. Harry Mosher, of Prospect avenue.

Mrs. John Shepherd of Portland is the guest of Mrs. Harris L. Elliott of Washington street.

Mr. and Mrs. Brooks of Franklin street are entertaining Mr. Brooks' aunt and husband, Mr. and Mrs. McCormick, of New York.

Mrs. Harold Goddard and son, Harold, of Melrose, Mass., who have been spending the month of July with Mrs. Goddard's parents, Mr. and Mrs. Fred H. Atwood of the Virginia District, leave on Saturday of this week for their home.

Rev. and Mrs. Maurice Reynolds of Massachusetts will spend the month of August with Mrs. Reynolds' parents, Mr. and Mrs. Fred H. Atwood of Prospect avenue. On Sunday next Mr. Reynolds will occupy the pulpit of the Baptist church. Mr. and Mrs. Reynolds are well known in Rumford, having formerly resided here, at that time Mr. Reynolds being the manager of the Woolworth Store.

Mr. and Mrs. T. S. Goddard of Franklin street spent several days of this week at their camp at South Rangely, on the shores of Rangely Lake.

Miss Maria Barker of Auburn, Mass., who has been the guest of her grand niece, Mrs. George A. Hutchins of Newbury Road, for two weeks past, will leave on Sunday for West Bethel, where she will spend some time with her niece and nephew, Miss Alice and Mr. Clarence Barker of that place. She

## WEST PARIS

Mrs. Ellen Willis returned Monday from a few days with her son, L. F. Willis and wife at Mechanic Falls.

Mrs. Mary E. Stetson spent Tuesday and Wednesday with her aunt, Mrs. George I. Burnham, at South Paris. She was the invited guest of Mrs. Burnham to attend Chautauqua.

D. H. Fifield, Mr. and Mrs. P. C. Mayhew and Mildred Davis took an auto trip to Old Orchard, Sunday.

Mr. and Mrs. Eugene Haines and Raymond, Mr. and Mrs. A. H. Mann and Mary motored to Augusta and Togus, Sunday.

Mr. and Mrs. Edwin J. Mann entertained a family party Sunday at their new camp, Lilyville. Round Pond, Locke's Mills, composed of Mr. and Mrs. Lewis M. Mann, Lewis Jacob Mann, Mr. and Mrs. H. R. Tuell, Mrs. Cynthia H. Curtis, which was the opening of the camp.

Tuesday Mrs. Edwin Mann entertained the following guests at Lilyville in honor of the birthday of her mother, Mrs. Tuell. The party was composed of Mrs. D. H. Fifield, Mrs. E. J. Dennen, Mrs. Carrie Caldwell, Mrs. Samira Dunham, Mrs. Cynthia Curtis, Mrs. George Tuell and Lewis Jacob and Geneva Heath Mann. The company went up in J. W. Cummings' car and after passing a happy day returned home by the delightful drive through Greenwood.

Mrs. Daniel C. Churchill suffered a bad fall the first of last week which fractured one rib and otherwise injured her. Mrs. Churchill is about eighty-three years of age, and has always been very active and has done the work for a family. She had climbed upon a hardwood table to wash a window and fell off, and the table came over on to her, injuring her across the stomach and side.

H. H. Wardwell and family spent last week at Buckfield with Mrs. Wardwell's parents, Mr. and Mrs. C. M. Irish.

Mrs. A. J. Ricker and Mabel Ricker were in Norway, Thursday.

Maynard Chase was at home for about twenty-four hours last week. There was a very delightful gathering of old friends at "The Pines," the residence of Mrs. W. W. Dunham on Main street, Friday. Fifteen guests were present, and as the day was perfect they enjoyed a picnic dinner under the pines, and spent much of the day on the piazza and the beautiful grounds around her home. The company was composed largely of people who although young in years, had already passed the mile stone of three-score years and ten, and some who nearly reached four score and ten. Those present were: Mrs. Eliza Lawrence of Lawrence, Mass., aged 72; Mr. and Mrs. A. J. Abbott of North Paris, Mr. Abbott aged 72, Mrs. Abbott 74; Mrs. Columbia Dunham, 70; J. R. Tucker, aged 78; Mrs. J. R. Tucker, 74; Isaac Tuell, 70; Mrs. Rose Tuell, 77; Samuel W. Dunham, 80; Mrs. Martha Dunham, 71; George Dunham, 65; Mrs. Levi Shedd, 72; Mrs. Clara Ballou, Mrs. Dora Jackson, Miss Ruth Tucker. The combined ages of the party were 612 years. All voted they had passed a most enjoyable day.

Laura Emery has recently been at home from Baldwin. Vernon Ellingwood has collected, and Mrs. Ellingwood and the children will return from Buckfield and occupy rooms in the Locke house.

Mrs. L. F. Emmons is staying at her rooms in her home occupied by Dr. Staples, and calling on friends and relatives.

Miss Della H. Lane will go to Ferry Beach Park, Tuesday, for a week. Madeline Peabody, Alice Barden, Eva Tucker and Russell Briggs are at Ferry Beach.

Laura Barden is clerking in George Irvine's store.

Mrs. Paul Whittier and son, Paul, Jr., who have been guests at Quincey Day's, have returned to their home in Massachusetts.

Mr. and Mrs. Watson of Boston are spending at P. S. Farnum's. Mrs. Watson is a sister of Mr. Frank P. McKenney.

Mrs. Fuller of Dickvale, who has been a guest of her daughter, Mrs. E. D. Curtis, has returned home. Mrs. Curtis took her home in the auto.

## ANDOVER

Mrs. Alice Merrick from New York is spending her vacation at the Gregg house.

Y. A. Thurston was at Berlin, N. H., Monday, on business.

There was a meeting of the officers of the Red Cross Society, Friday evening, July 27, at the home of Mr. Alexander Jackson.

A number of ladies met at the summer home of Mrs. George M. Newhall, Friday morning of last week to crochet for the French children. Those in the party were: Mrs. Emma Adams, Mrs. Clayton Sweet, Mrs. Abbie Poor, Mrs. Alexander Jackson, Mrs. Mary Frost, Mrs. Y. A. Thurston, Miss Constance Poor and sister, Miss Jennie Cushman, Miss Agnes Poor and Mrs. Newhall.

Mr. and Mrs. Guy Morton are receiving congratulations on the birth of a son, Tuesday, July 24.

Mrs. Henry Mills and daughter, Mrs. Titus, from West Medford, Mass., are visiting at L. E. Mills'.

John Hawley and son Ralph, are in town for a few days from their camp at Parmachenee Lake.

Holton Abbott and family and Y. A. Thurston and wife attended the Universalist church at Rumford Point, Sunday afternoon. Rev. C. G. Miller from South Paris supplied the pulpit.

A heavy electrical shower passed over Andover, Monday evening.

Carroll Elliott and wife from Melrose, Mass., are visiting at the home of Rev. John W. Suter, Jr., this week.

Rev. John W. Suter, Jr., will preach at the Congregational church Sunday morning, August 5. A collection will be taken for the Red Cross Society.

A number of ladies were in Rumford, Thursday afternoon to attend the canning demonstration.

The King's Daughters meet this Thursday with Mrs. C. A. Rand.

Mr. and Mrs. R. L. Melcher and Mr. and Mrs. Elmer Lovejoy from Rumford were in town, Sunday.

Rev. George Lincoln and family from Germantown, Pa., arrived in town last week and will again occupy the home of John Talbot.

Ray Thurston and L. R. Hall were at Bethel, Monday.

Jesse Glover is haying for the Abbott Brothers.

Montgomery Poor is soliciting aid for the Red Cross Society in town.

"The Old Peabody Pow" will be given in the Methodist church by local talent, Monday evening, Aug. 6.

Following is the cast of characters: Mrs. Baxter, the minister's wife;

Edith Akers

Mrs. Miller, wife of Deacon Miller the sexton,

Mrs. Fred Milton

Mrs. Burlbank, president of the Dorcas Society,

Mrs. Guy Akers

Mrs. Sargent, the village historian,

Annie Akers

The Widow Buzzell, willing to take a second risk,

Mrs. Arthur Lang

Miss Lohelia Brewster, who is no lover of men,

Alice Andrews

Miss Maria Sharp, quick of speech, sound of heart,

Constance Poor

Miss Nancy Westworth, who has waited for her romance ten years,

Gladys Howard

Justin Peabody, sole living claimant to the Old Peabody Pow,

Arthur Marston

Ice cream and cake will be served on the lawn after the play.

PROBATE NOTICES.

To all persons interested in either of the Estates hereinafter named:

At a Probate Court in Paris in vacation in and for the County of Oxford, on the thirty-first day of July, in the year of our Lord one thousand nine hundred and seventeen. The following matter having been presented for the action thereupon hereinafter indicated, it is hereby ORDERED:

That notice thereof be given to all persons interested, by causing a copy of this order to be published three weeks successively in the Oxford County Citizen newspaper published at Bethel, in said County, that they may appear at a Probate Court to be held at Rumford on the third Tuesday of August, A. D. 1917, at 9 o'clock in the forenoon, and be heard thereon if they see cause.

Antonie Plourde late of Bethel, deceased; petition for the appointment of Frank E. Farrington or some other suitable person be appointed as administrator of the estate of said deceased, presented by Antoinette Plourde, mother and heir.

## POEMS WORTH READING

### THE RETURN.

Upon the village as he passed  
The spell of August lay;  
He walked as one who reads again  
A long familiar way;  
Yet those who met him merely met  
A stranger, grim and gray.

He saw the old house through the trees  
That crowned the little hill.  
The rain of twilight held the world,  
And all the bells were still;  
But in the woods beyond the fields  
He heard a whippoorwill.

The little windows of the house  
With lights became eyes;  
He passed a time where shadows  
formed  
Outside the cherry trees,  
And saw the moon with eyes of one  
Who dwells within a dream.

For to a woman's form he there  
Broke the twilight door;  
The moon, with eyes, looking eyes,  
The wind that rustled leaves,  
Yet on the green the grass he grew  
For twenty years or more.

And other forms of other years  
A girl with tangled hair,  
A man with laughing eyes,  
A woman, young and fair,  
And four were coming from the house—  
What in the end they meant.

He saw and knew the house behind,  
The stranger's eyes and gray;  
The moon, the wind that rustled leaves,  
The moon, the wind that rustled leaves,  
Yet on the green the grass he grew  
For twenty years or more.

He saw and knew the house behind,  
The stranger's eyes and gray;  
The moon, the wind that rustled leaves,  
The moon, the wind that rustled leaves,  
Yet on the green the grass he grew  
For twenty years or more.

He saw and knew the house behind,  
The stranger's eyes and gray;  
The moon, the wind that rustled leaves,  
The moon, the wind that rustled leaves,  
Yet on the green the grass he grew  
For twenty years or more.

He saw and knew the house behind,  
The stranger's eyes and gray;  
The moon, the wind that rustled leaves,  
The moon, the wind that rustled leaves,  
Yet on the green the grass he grew  
For twenty years or more.

He saw and knew the house behind,  
The stranger's eyes and gray;  
The moon, the wind that rustled leaves,  
The moon, the wind that rustled leaves,  
Yet on the green the grass he grew  
For twenty years or more.

He saw and knew the house behind,  
The stranger's eyes and gray;  
The moon, the wind that rustled leaves,  
The moon, the wind that rustled leaves,  
Yet on the green the grass he grew  
For twenty years or more.

He saw and knew the house behind,  
The stranger's eyes and gray;  
The moon, the wind that rustled leaves,  
The moon, the wind that rustled leaves,  
Yet on the green the grass he grew  
For twenty years or more.

He saw and knew the house behind,  
The stranger's eyes and gray;  
The moon, the wind that rustled leaves,  
The moon, the wind that rustled leaves,  
Yet on the green the grass he grew  
For twenty years or more.

## WILLIAM TELL FLOUR

"Now, dolly, don't you forget!  
Do all your baking with  
WILLIAM TELL FLOUR"  
DAISY BAKER

All through the day,  
Then, when at night-time  
We'll rest complete,  
Always and wholly  
At our dear Master's feet

Learning our lessons  
Which Thou dost give;  
Never to doubt Thee  
Not just that and live.

THE CITY COUNCIL.  
He's my own cousin, man and wife,  
But not his wife's wife;  
Because he's always lived in town and  
So he hasn't seen  
No very many things. He said he never  
saw a cow.

And all the grass he ever saw was in  
a yard till now!  
He never gathered mowing ears, and  
it's the first time he  
threw up a stick to knock down a cow  
and ate 'em off the tree!

And he don't know where honey  
grows and never learned to swim!  
My! I would hate to be that old and  
not know more than him!

When he is home there ain't a creek  
and he never goes  
A fishing, and he hasn't got a suit of  
real old clothes,  
The kind you have to have to fish,  
and he says he can't go  
Horseback with us because the grass and  
weeds would hurt his feet!

He won't chew slippery elm bark or  
beechwood; he's afraid  
Of it because he told us that he didn't  
know how it's made;  
And he won't dig up angle worms be-  
cause they wiggle so,  
I never saw the place he lives, but  
say! it must be slow!

He don't know what a spring board  
is, and hasn't got a hat  
That you can dip a drink up with—  
he never heard of that!  
And if it's raining in the woods he  
hurries up to get  
Back home because he's so afraid he'll  
get his straw hat wet  
One day we killed a garter snake—  
and he don't have them in town—  
And he don't know the tail won't dig  
out the new good dirt!  
And he is sorry that he never saw  
down here, the more  
He thinks of all the things he's  
learned he didn't know before!

Well, I suppose he has to live some-  
where, but it must be  
An awful thing to live so long and  
never think a tree,  
To play a watermelon when you think  
it's a tree, or worse  
The kind of clothes that you can sit  
and do not want to care,  
To drive into the woods at all upon the  
horns and get  
Your back all cracked up and burned  
when you run at a tree!  
When it is time to go to bed! He never  
learned to count  
Not I would hate to be that old and  
not know more than him!

THE KISSER'S PRAYER.  
Mim! Gott, will you be mine partner  
You don't know who I am,  
I am the German Kiss!  
The Emperor I am.

You know I whipped dem Belgians  
And dem whippers dem Russians full  
And dem whippers dem French and Italy  
And dem whippers dem Johnny Bull.

You know dem old nations  
I don't give a damn  
If you just be my partner  
And whip that Uncle Sam.

You know I got dem submarines  
And dem whippers dem Russia full  
And dem whippers dem French and Italy  
And dem whippers dem Johnny Bull.

You know I got dem submarines  
And dem whippers dem Russia full  
And dem whippers dem French and Italy  
And dem whippers dem Johnny Bull.

You know I got dem submarines  
And dem whippers dem Russia full  
And dem whippers dem French and Italy  
And dem whippers dem Johnny Bull.

You know I got dem submarines  
And dem whippers dem Russia full  
And dem whippers dem French and Italy  
And dem whippers dem Johnny Bull.

You know I got dem submarines  
And dem whippers dem Russia full  
And dem whippers dem French and Italy  
And dem whippers dem Johnny Bull.

THE KISSER'S PRAYER.  
Mim! Gott, will you be mine partner  
You don't know who I am,  
I am the German Kiss!  
The Emperor I am.

And dem whippers dem Russia full  
And dem whippers dem French and Italy  
And dem whippers dem Johnny Bull.

You know I got dem submarines  
And dem whippers dem Russia full  
And dem whippers dem French and Italy  
And dem whippers dem Johnny Bull.

You know I got dem submarines  
And dem whippers dem Russia full  
And dem whippers dem French and Italy  
And dem whippers dem Johnny Bull.

You know I got dem submarines  
And dem whippers dem Russia full  
And dem whippers dem French and Italy  
And dem whippers dem Johnny Bull.

You know I got dem submarines  
And dem whippers dem Russia full  
And dem whippers dem French and Italy  
And dem whippers dem Johnny Bull.

You know I got dem submarines  
And dem whippers dem Russia full  
And dem whippers dem French and Italy  
And dem whippers dem Johnny Bull.

## NORWAY

The death of Clara Eleanor Curtis,  
the three year old daughter of Mr.  
and Mrs. Guy Curtis of Norway Cen-  
ter, occurred Friday morning, death  
being due to tubercular meningitis,  
following an illness of about two  
weeks.

Dorcas, the 10 months old child of  
Mrs. Maude R. Strout, died Friday  
morning at 2:30 o'clock after only a  
few hours illness.

The Vermont Club met Thursday  
evening at the home of Mrs. Alta J.  
Shen, when the time was spent in  
clipping for the Red Cross papers.

The members of the Hospital Corps  
were given a great send off, when  
they left the station at South Paris  
Friday morning, several hundred peo-  
ple gathered to wish them God speed  
as they departed for Portland.

Dr. Austin Tenney, the oculist, was  
in town for the day, Friday.

Miss Harriett Craigie, who teaches  
at Everett, Mass., is visiting her moth-  
er, Mrs. Susan Craigie, Winter street.

Mrs. Herman W. Richardson and  
daughter Phyllis, were guests this  
evening at the home of Mr. and Mrs. M.  
C. B. Prince, at Mechanic Falls. Her  
sister, Violet, returned home with her  
on a visit.

Mrs. Lillian Allen of North Wood-  
stock, N. H., is the guest of her father,  
Benjamin Tucker and family at  
Norway Lake. Mr. Allen has been  
visiting his sister at Winter Har-  
bor. His daughters, Ruth and Doris,  
who have been spending two weeks  
with their grandfather, will return  
home with him the middle of next  
week.

Mrs. Susan Merrill, who has had a  
home at Miss Olive Woodman's for  
the past two years, has gone to Mrs.  
Hattie Smith's, Lena street, to board.

Miss Tessie Taborian has returned  
home from a visit with her sister,  
Mrs. George Howe, at Fairhaven, Por-  
tland.

There will be no church services at  
the Baptist church during the month  
of August, but the Sunday school and  
Christian Endeavor society will hold  
their sessions as usual. The Home De-  
partment of the church entertained  
the Cradle Roll babies and their  
mothers at the church Wednesday af-  
ternoon, when there were 46 present.

A short program was presented, and  
a refreshment was served of ice-  
cream and cake. During the afternoon  
pictures were taken of the group.

The Annual Field Day of Oxford  
County Association of the Eastern  
State will be held at Gibson's Grove,  
Tuesday, August 21. An interesting  
program has been prepared. The us-  
ual picnic dinner will be enjoyed. Caf-  
fee will be furnished, and all attend-  
ees are requested to carry their cups.

Thursday Postmaster Delbert sent  
out cards to every woman and girl  
over 18 years of age, which, when  
signed will entitle the signer as a  
Member of the United States Food  
Administration. These cards are sent  
out to increase the interest, and also  
to the present food campaign. Every  
signer will receive a tag, as a remind-  
er of the pledge.

Motor vehicle warning signs are be-  
ing placed about town, cautioning  
drivers about conditions ahead. At  
the corner of Paris and Main streets,  
a schoolhouse sign has been set, 300  
feet before the High school building.

Jameson Flansy has accepted a  
position as night superintendent of the  
Hampden Falls Light and Power Co.  
and will move to Dixfield, where his head-  
quarters will be located. Mr. Flansy  
has been employed with the Electric  
Light Co. at Bethel, and for several  
years has had experience with the  
Oxford Electric Company. He is well  
qualified to fill his new position. The  
system handles heat, light and power,  
with modern equipment.

William Cash, who has worked for  
the Oxford Electric Co. for a number  
of years, will finish work Saturday  
night, and goes to Portsmouth, N. H.,  
where he has a position at the United  
States Navy Yard. The Norway Elec-  
tric Company loses two good men in  
Mr. Flansy and Mr. Cash.

The cement mixer took a trip to the  
head of the street Thursday morning,  
where the electric car track above and  
below the printing office is being re-  
constructed. This will complete the work  
on the road for the year. Engineer  
Jack Denney finished work for the  
town and returned to his home in  
Branford.

Mrs. Bernice Pike of Quebec is vis-  
iting her daughter, Mrs. Walter W.  
Partridge, Alpine street. Mrs. Pike  
has resided with her daughter, Mrs.  
Jack Pike, in Quebec for the past  
three years.

A. H. Stewart of New York City, who  
is spending the summer at Little Port  
Penobscot, is building a cottage  
near the one owned by Harry Pack  
and.

Miss Lella Watson went to Bethel  
the last of the week, where she plans  
to spend several weeks with her niece.

Mrs. Anna Warren Ross and family.  
Miss Viola Merriman of Norway Cen-  
ter is visiting her grandparents at  
West Minor.

Clifford Buck writes from Sootland  
that the members of the Sawmill Unit  
arrived safely, and they are still wait-  
ing for the mills, machinery and hor-  
ses. He says the country is very pret-  
ty, crops looking fine and green.

Harold J. Chandler, who has been  
stationed at Fort Slocum for the past  
few weeks, has gone to Fort Sam-  
Houston, San Antonio, Texas, with the  
quartermaster corps, to which he be-  
longe.

Miss Maude Williams of Springfield,  
Mass., is visiting her sister, Mrs. Ho-  
mes Sanborn, Paris street.

Horace Sanborn is employed this  
summer with his brother in Portland  
at his machine shop. He contemplates  
moving there this fall.

Miss Ruth Clement of Elizabeth, N.  
H., is at the Clement cottages at the  
lake with her parents.

Miss Lauretta Foster is stopping  
with Miss Emma J. Smith at Tangle-  
wood cottage.

Mr. and Mrs. Fred Moffatt returned  
to their home at Dorchester, the first  
of the week.

Capt. Herbert M. Rockwell of Bos-  
ton has been in town the past week,  
recruiting for the Junior Volunteer  
movement at Winthrop Center, and  
several boys have volunteered this  
week. Elmer G. Matter, Wallace Sar-  
gent and Albert B. Pyne went Tues-  
day and Albert Carroll, Carlton  
Young, Lewis Davis and Robert  
Brook went Friday for examination.

Roger Sloan, who has been employed  
at the Carroll-Johnson factory in the  
shipping department, has gone to Por-  
land Springs, where he has employ-  
ment.

Mrs. Charles A. Frost and grandson,  
William Keene, of Framingham, Mass.,  
are spending two weeks with Mr. and  
Mrs. Adon Keene and family, Col-  
tage street.

Miss Christine Leavitt, who is  
training for a nurse in Boston, will  
spend her vacation at home.

Amrose Warren, who has been  
spending several weeks with his sister,  
Mrs. George A. Brooks, returned to  
his home in Boston, Wednesday.

Howard Horne, who has been the  
guest of his grandparents, Mr. and  
Mrs. H. D. Smith, for several weeks,  
returned to his home in Fairhaven,  
Mass., Thursday.

Rev. and Mrs. Charles H. Tenney  
and their daughter Mrs. Ruth Harris  
and two children of Southbridge,  
Mass., arrived in town Thursday,  
and will spend the remainder of the sum-  
mer at the Eugene Hayden cottage  
at the lake.

C. P. Hill of Montreal arrived  
Thursday at Rock Island, where he  
will be the guest of Dr. Albert Thomp-  
son and family.

Knowles of Portland are spending  
their vacation with Mr. Frost's par-  
ents, Mr. and Mrs. Ann D. Frost.

Mr. and Mrs. Arthur Delano and  
son, Stephens, of Dorchester, Mass.,  
are visiting Dr. and Mrs. Charles A.  
Stephens at Norway Lake.

Mrs. John P. Cullinan was called to  
Lewiston, Tuesday, as her sister, Mrs.  
Jessie Towler of Oilead, was taken to  
the C. M. O. Hospital, having had the  
misfortune to break her leg in two  
places and hospital treatment was ne-  
cessary to reduce the fracture.

GRASSHOPPERS.  
Are They in Your Field This Spring?

The following was issued recently  
from the Maine Agricultural Experi-  
ment Station, Dr. C. D. Woods, direc-  
tor, at the University of Maine:

In certain localities young grasshop-  
pers are abundant this spring. Crows  
and blackbirds are enjoying them but  
if they do not get them all, these pests  
are likely to make trouble unless some-  
thing happens to kill them.

It is quite possible to make "some-  
thing happen to kill them," as success-  
ful campaigns against grasshoppers in  
western states have demonstrated from  
time to time in seasons of dire distress.

The following suggestions are adapted  
to Maine conditions by the Maine  
Agricultural Experiment Station from  
the records of one such battle printed  
in the Journal of Economic Entomol-  
ogy as an account of grasshopper  
control work in Kansas. As the same  
species (*Melanoplus bivitatus* and *M.  
aluticus*) which wrought havoc in Kan-  
sas are among our commonest grass-  
hoppers in Maine, there seems no reason  
why the same remedies applied  
there should not prove equally efficient  
here.

Formulas:  
Bran ..... 30 lbs.  
Paris green ..... 1 lb.  
Syrup (common house syrup) 2 lbs.  
Oranges or lemons ..... 3 fruits  
Water ..... 4 1/2 gallons  
(Caution. Do not add water until the  
dry mix is to be used.)

Preparation and distribution:  
Mix the bran and Paris green thor-  
oughly in a sack with white dirt,  
squeeze the juice of the oranges or  
lemons into the water, and chop the

remaining pulp and the peel to fine  
bits and add them to the water. Dis-  
solve the syrup in the water and wet  
the bran and poison with the mixture,  
stirring at the same time so as to  
thicken the mash thoroughly.

The bait when flavored with oranges  
or lemons was found to be not only  
more attractive, but also more appetiz-  
ing and thus was eaten by more of the  
grasshoppers.

The damp mash or bait should be  
sown broadcast in the infested area  
early in the morning, or about the time  
the grasshoppers are beginning to move  
about from their night's rest. It  
should be scattered in such a manner  
as to cover five acres with the amount  
of bait made by using the quantities of  
ingredients given in the above formula.

Since very little of the bran mash is  
eaten after it becomes dry, scattering  
it broadcast in the morning, and very  
thickly, places it where the largest  
number will find it in the shortest time.  
Sowing it in this manner also makes  
it impossible for birds, barnyard  
fowls, or live stock to secure a suf-  
ficient amount of the poison to kill  
them. Inasmuch as the poisoned bait  
does not act quickly, it will be from  
two to four days before the grasshop-  
pers are found dead, and these will be  
more numerous in the sheltered places.  
It does not require much of the poison  
to kill them. Even a small portion from  
one of the poisoned flakes will be suf-  
ficient to cause death.

We quote directly from the account  
of the Kansas work:

"The grasshoppers ate and so raved  
as they were for the poisoned bait  
that they even left their choicest green  
feed. In two days the poison had done  
its work. Investigations and reports  
from all over the country showed that  
from 60 to 70 per cent of the grass-  
hoppers had been killed by the first  
application. Counts made in alfalfa  
fields of average infestation, showed  
from one hundred and fifty to two hun-  
dred and fifty dead grasshoppers per  
square foot. In many places under a  
single tree there was a peck of dead  
grasshoppers, and along hedges the  
ground directly under the hedge was  
completely covered, and in some places  
they were actually piled up two or  
three deep. In other words, the results  
were far better than anyone could have  
expected."

The Kansas campaign was a suc-  
cessful example of organized cooperation,  
and demonstrated what can be done in  
the face of so serious a matter as a  
grasshopper plague over an extended  
area. Coordinated action in infested  
localities in Maine would doubtless bring  
the same results. However, much can  
be done by a few neighbors working  
together or even single individuals  
with the persistent hard work here re-  
commended.

## BUREAU COLLEGE

The investment of time and money nec-  
essary training is much less than would be  
any other way.  
Let us know what courses you are inter-  
ested in and we will give you a plan of study  
concerning time and cost.  
Call, write or telegraph.  
FALL TERM BEGINS TUESDAY, SEPT. 10.  
New Students admitted every Monday.  
Advanced students admitted every Monday.  
A good position is provided every graduate.  
The College is open from 9 a.m. to 5 p.m.  
Night School begins Monday, Sept. 24.  
The Bureau College Courses are: Business, Account-  
ing, Bookkeeping, Applied Business and Manage-  
ment, Civil Service, Secretarial, Penmanship, English,  
and 18 Boylston St., Washington St., Boston.

## POULTRY YARD SANITATION.

By G. E. Conkey.  
No poultry keeper can long disregard  
the question of sanitation without en-  
couraging disastrous results in his  
stock, and this applies alike to the  
back-yard and the range of thousands.

The hot weather naturally increases  
the dangers arising from neglected  
sanitary precautions and you'll do well  
to acquaint yourself with the care de-  
manded at this time. Sometimes seem-  
ingly small matters will lead to seri-  
ous troubles and even cause a heavy  
loss in the flock in a very short time.

A GOOD LOCATION SAVES WORK.  
There is always a great advantage  
in having houses and runs favorably  
located for this greatly lessens the  
work of caring for the runs and more  
time can be devoted to the attention  
of the house interior, fixtures, and small  
equipment. It is possible that some  
may be more fortunate than others in  
having good natural conditions but at  
the same time there are certain atten-  
tions demanded in the way of sanitation  
if uniformly successful results are to  
be obtained.

PURIFYING THE SOIL.  
A loose soil with good drainage can,  
with a very little care, be kept free  
from contamination, but a heavy soil  
like clay needs constant care or it will  
get into such a filthy condition as to  
endanger the health of the birds. It  
is best to plow or grade all ground that  
is devoted to poultry use at least once  
a year, but where the soil is heavy or  
the birds are rather crowded, this work  
should be done with more frequency.  
However, with a poor soil there is a  
limit to the time the land should be  
used for poultry if the stock is to be  
kept free from disease.

Whenever possible some quick grow-  
ing crop should be planted in the runs  
for vegetable growth is a great soil  
sweetener and renovator. Where there  
is plenty of room it is an excellent idea  
to provide two yards for each flock or  
pen so that one can be seeded down  
while the other is in use. If the land  
is rich that it cannot be freshened by  
cultivation or vegetable growth, or at  
least when these do not prove sufficient  
for the purpose, then covering the  
ground with a coating of lime makes  
a good purifier. Also a weak solution  
of carbolic acid or a coal tar disinfect-  
ant will be found a good germ killer  
and destroyer of parasites in the soil.  
Use these things frequently when they  
are needed during hot weather. Where  
any filth can be removed this should  
always be done before spraying. Fill  
up any low spots or mud holes that  
may be in the run so the birds will  
have no place from which to drink  
filthy water after a rain.

Soil contamination, naturally, is of  
the concern with the farm stock hav-  
ing a large range but at the same time  
it is true that poultry is often kept  
where it is possible for the birds to  
drink from pools of stagnant water,  
especially about the barn yard, and  
during the hot months in particular  
there is danger of this causing serious  
digestive ailments. The remedy for  
this particular trouble lies in better  
drainage or grading and filling in of  
these low places.

CARE OF POULTRY HOUSES.  
The poultry house itself demands of  
all alike a certain amount of care in  
the destruction of disease germs and  
parasites and no half-way measures  
will answer here, for the work must be  
systematic and efficient.

The application of a coat of white-  
wash to the interior of the house is a  
common method of disinfection, and  
it also has the advantage of bright-  
ening it and improving the appearance.  
A strong carbolic acid or a coal-tar dis-  
infectant is the whitewash will great-  
ly increase its efficiency. The house  
should be gone over once or twice a  
year in this way. Just before each ap-  
plication is a good thing to give the  
house a thorough cleaning, removing  
rocks, nests and other fixtures as far  
as possible, to get into every corner  
and service. A good spray pump will  
greatly lessen the work of applying  
whitewash and this also could be used

# BURDETT COLLEGE

## Time—Cost

The investment of time and money necessary to get a thorough business training is much less than would be necessary to get a good start in any other way.

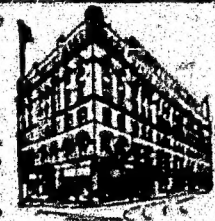

Let us know what courses you are interested in and what has been your previous schooling and experience and we will give you interesting information concerning time and cost.

Call, write or telephone.

FALL TERM BEGINS TUESDAY, SEPT. 4

New Students admitted every Monday and Tuesday. A good position is provided every graduate. New Catalogues sent free on request. Night School begins Monday, Sept. 24. The Burdett College Courses are: Business, Accounting, Secretarial, Combined, Applied Business and Management, Normal, Civil Service, Shorthand, Typing, Spanish, and Special.

18 Boylston St., Boston, Mass.

## POULTRY YARD SANITATION.

By G. E. Conkey.

No poultry keeper can long disregard the question of sanitation without encountering disastrous results in his flock, and this applies alike to the back-yard and the range of thousands.

The hot weather naturally increases the dangers arising from neglected sanitary precautions and you'll do well to acquaint yourself with the care demanded at this time. Sometimes seemingly small matters will lead to serious troubles and even cause a heavy loss in the flock in a very short time.

A GOOD LOCATION SAVES WORK. There is always a great advantage in having houses and runs favorably located for this greatly lessens the work of caring for the runs and more time can be devoted to the attention of the house interior, fixtures and small equipment.

It is possible that some may be more fortunate than others in having good natural conditions but at the same time there are certain attention demanded in the way of sanitation if uniformly successful results are to be obtained.

PURIFYING THE SOIL. A loose soil with good drainage can, with a very little care, be kept free from contamination, but a heavy soil like clay needs constant care or it will get into such a filthy condition as to endanger the health of the birds.

It is best to plow or spade all ground that is devoted to poultry use at least once a year, but where the soil is heavy or the birds are rather crowded, this work should be done with more frequency. However, with a poor soil there is a limit to the time the land should be kept for poultry if the stock is to be kept free from disease.

Whenever possible some quick growing crop should be planted in the runs for vegetable growth is a great soil sweeter and renovator. Where there is plenty of room it is an excellent idea to provide two yards for each flock or pen so that one can be seeded down while the other is in use. If the land is such that it cannot be freshened by cultivation or vegetable growth, or at least when these do not prove sufficient for the purpose, then covering the ground with a coating of lime makes a good purifier. Also a weak solution of carbolic acid or a coal tar disinfectant will be found a good germ killer and destroyer of parasites in the soil. Use these things frequently when they are needed during hot weather. Where any filth can be removed this should always be done before spraying. Fill up any low spots or mud holes that may be in the run so the birds will have no place from which to drink dirty water after a rain.

Soil contamination, naturally, is of little concern with the farm flock having a large range but at the same time it is true that poultry is often kept where it is possible for the birds to drink from pools of stagnant water, especially about the barn yard, and during the hot months in particular there is danger of this causing serious digestive ailments. The remedy for this particular trouble lies in better drainage or grading and filling in at these low places.

CARE OF POULTRY HOUSE. The poultry house itself demands of all alike a certain amount of care in the destruction of disease germs and parasites and no half-way measures will answer here, for the work must be systematic and efficient.

The application of a coat of whitewash to the interior of the house is a common method of disinfection, and it also has the advantage of brightening it and improving the appearance. Adding carbolic acid or a coal-tar disinfectant to the whitewash will greatly increase its efficiency. The house should be gone over once or twice a year in this way. Just before such application is a good time to give the house a thorough cleaning, removing dirt, manure and other fixtures as far as possible, to get into every corner and service. A good spray pump will greatly lessen the work of applying whitewash and this also could be used

for disinfectants and the spraying of fruit trees, shrubbery, etc. In hot weather lice preparations must be used in the house regularly every week or two and especially about roosts and nests for you must not take any chances of mites getting a start. Keep these pests out of the house altogether by systematic work commenced early in the spring.

LICE LIQUIDS NECESSARY. Lice liquids with disinfecting properties and contact disinfectants are best suited for ordinary use in the poultry house for they will kill disease germs as well as lice and mites. When a generous disinfectant is needed to reach the ceiling of houses or in new-hatched or brooders, formalin (formaldehyde) is most effective providing the vapors are confined. A three or five percent solution is used for spraying the interior of houses or chicken.

CLEANLINESS ESSENTIAL.

It is not a good plan to leave droppings accumulate in the poultry house at any time, but it is particularly harmful to do so in hot weather. Remove them daily when possible or at any rate once a week. Filth makes a good breeding place for lice and disease germs. Unusual cleanliness is demanded in the case of drinking vessels and they should be thoroughly cleaned every day or two using a little disinfectant in the wash water. Keep the drinking water in a cool place and always out of the sun.

If you will keep the health and comfort of your birds well in mind during the warm weather you are sure to be well repaid for any labor expended. Results are largely what you make them so take no chances in the summer care of your flock.

## BABY BEETS FOR WINTER.

Can Them if You Have Cans—Dry Them if You Have No Cans.

Now is a good time for garden owners in many sections who have more beets of the early crop than they can eat in the fresh form and an abundance of glass jars and tin cans, to can baby beets, says the United States Department of Agriculture.

How to Can Baby Beets.

Grade for size, color, and degree of ripeness. Wash thoroughly, use vegetable brush. Scald or blanch in hot water sufficiently to loosen the skin. Dip quickly into cold water. Scrub or pare to remove skin. Pack whole vegetables, sliced, or cross-section pieces in hot glass jars or tin cans. Add boiling hot water until full. Add level teaspoonful salt to quart. Place rubbers and tops of jars in position; partially seal, but not tight. Cap and tip the cans completely. Place on false bottom in a vessel of hot water which just covers the containers. Sterilize at boiling temperature in hot water—bath canners for 30 minutes.

Drying Beets. If the early crop of beets is abundant but jars or cans are not available, the surplus young beets may be dried for winter use.

Select young, quickly grown, tender beets. Wash, peel raw, slice about 1/4 inch thick, and dry over a stove, before an electric fan, or in the sun. The dried product may be packed in paper cartons in paraffined paper bags, baking powder or coffee cans, or other containers which will exclude moisture and insects.

## DO YOU USE FACE POWDER?

Are You Do Be Careful to Keep It From Getting In Your Eyes.

Face powder has its dangers. For several years occasional cases have come under the observation of oculists in which the patients, invariably women, complain of vision being blurred, inability to use the eyes for any length of time and severe itching of the lids. The slightest rubbing of the lids produces a marked redness of the eyes and only aggravates the itching. In severe cases the lids are frequently swollen from constant rubbing. There is a sticky, elastic secretion which, when being removed, pulls out in long strings.

Microscopic examination of the secretion reveals masses of what appear to be crystals. Until recently no satisfactory explanation of the presence of these crystals in the eye has been given. Secretions taken from the eyes of two sisters suffering from this peculiar complaint were submitted to the professor of pathology of one of the university medical schools, who found that the crystals came from face powder. Seven other patients in which the same symptoms and microscopic conditions were found all used face powder.

When the powder is applied to the face with a puff a part of the fine dust is driven upward and lodges on the moist eyeball. The powder in the presence of the tears then becomes mucilaginous in character and is not washed from under the eyelids. The powder produces the irritation, which is aggravated by rubbing. Those who use a clammy skin in applying the powder are less liable to cause the fine dust to adhere, which probably accounts for the condition not being found in every woman using face powder. The condition is quickly relieved by flushing the eye with boric acid solution. The irritation rapidly disappears when the eyes are kept washed out with a soothing eye wash.—From Journal of the American Medical Association.

## TIME IN PALESTINE.

It Is So Erratic That Making a Train Is Quite a Feat.

In Jerusalem town time and train time are different, forty minutes different, and both are variable. Train officials say the train leaves for Jaffa at 6:40 o'clock in the morning, but 6:40 o'clock by train time is 7:20 o'clock by town time. One morning when we were starting for Egypt we ordered our carriage for 7 o'clock. Arriving at the station at 7:35 o'clock, we found the train gone and the station empty. At last was routed out an official.

"Where's the train?" we demanded.

"Gone, messieurs."

"Gone? You've changed the hour of the train, then?"

"Non, non, messieurs. The train leaves at the same hour always, but the time has changed. Yesterday 6:40 o'clock train time was 7:20 o'clock town time. Today 6:40 o'clock train time is 7 o'clock town time. No, no"—and he smiled patronizingly—"the train always leaves at the same hour; our trains never change—it is the time that alters itself, not the train, messieurs."

We sought the telegraph office. "To the steamer agent to Jaffa," we dictated. "Missed train. Cancel passage on boat for Egypt. Wire date of next sailing for Port Said." This was turned into flowery Turkish and sent. A reply came soon.

"Plenty of time. Your boat will wait till tomorrow afternoon, for the water is so rough she cannot land her passengers and cargo today. Plenty of time if you take the train tomorrow."—At Jaffa Monthly.

Impudent Thieves.

The thieves of Mexico is reported to be one of the smartest and most impudent thieves in the world. Brantz Meyer tells of an English traveler who, within an hour or two, in the principal streets of Mexico, had first been booked from his head by a line from an upper window, and was then accosted by three desperadoes who directed him of his coat. The three bade him wait, and within a few minutes one returned and handed him a pawn ticket.

"We wanted \$30, not the coat," he explained. "Here is the ticket with which you can redeem it for that sum."—London Mail.

Surprise For Beth.

John Burns once paid a visit to a London lunatic asylum. He was taken all over the establishment, and finally arrived at the garden, where a number of patients were working. Burns espied among them a man with whom he had some slight acquaintance and was about to speak to him when the lunatic suddenly exclaimed: "Well, I never! You, too! The very last person I thought to see here!"—London Citizen.

Use For His Photograph.

Miss Wyke—And I may really keep this photograph of you, Mr. Simpkins (uttered)—Delighted. I'm sure! Miss Wyke (later to her maid)—Marie, take this photograph and whenever the original of it calls tell him I'm not in.—Boston Transcript.

Facing The Problem.

Father—What! You want to marry my daughter? Why, sir, you can't support her. I can hardly do it myself. Mother (blankly)—Can't we chip in together?—London Opinion.

Suitable Match.

"That girl has shocking ways!" "Maybe that's the reason she married an electrician."—Baltimore American.

[This matter must not be reprinted without special permission.]

The greatest fuel economy in the kitchen stove which consumes soft coal can be had with frequent replenishing and in small amount.

France keeps fifteen times as many sheep as the United States, and this fact has without doubt much to do with the thrift and wealth of the French people.

A piece of farm machinery left out in all kinds of weather will do well if it lasts five years. Its term of usefulness may be trebled if it is housed properly when not being used.

The feeding of beef steers appears to be a good deal less of a speculation with corn at 30 cents and beefs about worth 7 cents than it was with corn at 60 cents and steers at 10 cents.

A Minnesota man of the name of Vernon Adams raised an acre of corn the past year which yielded 113.6 bushels, and this in spite of the fact that Minnesota is not in the corn belt.

Give old Biddy two or three weeks of fine weather most any time during the winter and she'll do more to smash a corner in the egg market than any anti-monopoly legislation that could be adopted.

A sprig of parsley, rooted and started in a pot and given a place with the other house plants, not only makes an attractive foliage, but will furnish garnishes for the salads and cooked dishes during the winter.

While the donor is not a member of the party which elected Governor Wilson as president, William Galloway, the big Waterloo (Ia.) manufacturer, has announced that he will give a \$5,000 cow to President Wilson to supply his household with pure milk.

Not only the furniture of the home, but the hands and faces of its inmates, will be in better condition for keeping a dish of water slumming on the hand coal stove or a pall of it suspended from the furnace register. The kettle on the kitchen stove answers the purpose there.

A scientist, Professor Grainger, who has been making geological explorations in Wyoming, has discovered the remains of what he claims is the largest bird that ever frequented the American continent. The bird is supposed to have inhabited the country some time about 3,000,000 years ago.

Invariably a flock of hens will seek that spot in their yard during cold weather which is sheltered from north winds and which is also exposed to the sun. These are the chief advantages of the scratching shed and are practically a necessity if one is to get eggs during the winter months.

A full grown rat will consume a dollar's worth of grain and vegetables in the course of a year and oftentimes destroy or ruin in the same period property of many times the amount mentioned. It is because of this fact that the rat campaign is a vital and important one and that every one who can should have a hand in it.

Somebody has predicted the early collapse of the corner on eggs and that by Feb. 1 they will be retailing at 10 cents per dozen. Of course this is some consumer's pipe dream, but the unloading of a number of cold storage eggs in Chicago the other day at a loss of 2 cents per dozen from the purchase price would seem to indicate that the business has been overdone and that by the date mentioned the storage fellows will be running for cover.

The making of milk from hay by what is called the synthetic process has not been developed to the point where the person who has laid by a little savings fund would be justified in buying stock in any company purporting to manufacture the new product. Fellows who are engaged in the selling of such stock are not half so much interested in making milk out of hay as they are in getting hard cash out of blue sky and gullible suckers. Better steer shy of them.

There should be charcoal before the dogs all the time. The supply may be made from corncobs. These may be burned in a pit, which should be three or four feet wide, three feet deep and eight or ten feet long. A load of coals should be put in the pit and set alight. As soon as they are well ablaze the pit should be covered with strips of sheet iron and the cracks covered with earth so as to exclude the air. In a day or two the pit may be uncovered and a supply of charcoal will be ready for use.

## RATIONS FOR FATTENING STEERS.

Shelled corn, 21 pounds; cottonseed meal, 2 pounds; clover hay, 4 pounds, and corn silage, 15 pounds.  
Corn, 22 pounds; alfalfa hay, 5 pounds, and corn stover, 5 pounds.  
Corn, 14 pounds; alfalfa hay, 10 pounds, and corn stover, 7 pounds.  
Bar corn, 20 pounds; gluten or oil meal, 3 pounds, and clover hay, 8 pounds.  
Bar corn, 13 pounds; oil meal, 2 pounds; shocked corn, 15 pounds, and clover hay, 7 pounds.  
Corn, 15 pounds; cottonseed meal, 3 pounds, and mixed hay, 10 pounds.  
Alfalfa hay, 9 pounds, and corn, 18 pounds.  
Corn silage, 24 pounds; mixed hay, 5 pounds; shocked corn, 15 pounds, and cottonseed meal, 2 pounds.  
Corn silage, 30 pounds; shocked corn, 10 pounds, and cottonseed meal, 3 pounds.—American Agriculturist.

## WOOLLY FACED SHEEP.

Muffled Head Means Poor Mutton, Says English Shepherd.

The following from the London Live Stock Journal gives the views of an English shepherd on breeding for head covering. The writer says:

It appears as though increased attention was being paid to the question whether certain points to which judges of sheep are partial are of sufficient practical importance as to warrant the value placed upon them.

For instance, is the muffled head, which many judges of Shropshire sheep seem to value so highly, of any practical value? Is it an indication of an increased cut of wool or of wool of improved quality? Does a sheep possessing this muffled head produce when slaughtered a better carcass of mutton or one furnishing a larger proportion of lean meat? Is a muffled headed Shropshire more prolific and a better suckler? Does it grow and thrive better? If it be not superior in the above respects, in what other way is the muffed head an indication of superior commercial qualities, and what are they?

I am not asking these questions for the purpose of calling attention to the fact that serious doubts are being cast on the value of the fashionable Shropshire as a practical farmer's sheep nor to the alleged general complaint of the butchers that the prize winning Shropshire of the day is deficient in its loin and its leg of mutton and that the proportion of fat to lean is too great to suit the public demand. My object is rather to warn the present day breeders of Southdown sheep of the great danger that they are likely to fall into unless the present tendency on the part of some Southdown judges of placing undue stress on the plumpness of wool on the face of the Southdown is discontinued.

It has been asserted by some of our most observant breeders of sheep that a large increase in the amount of wool on the face of a sheep almost certainly indicates a decrease of lean meat in the carcass of the sheep. This view is certainly supported by the decisions of the judges of the carcasses of sheep at the Southdown and other shows, where the major portion of the prize money is awarded to the carcasses of sheep which in life had moderately clean faces.

It is a point of much importance and one which is worthy of discussion by some of our eminent stockmasters.

The Difference in Breeds. There is no mystery surrounding the feeding habit of the dairy cow. It is common knowledge that a certain amount of feed is required to support the animal body. The amount varies with the individual cow. It is known that the feed consumed by the cow in excess of bodily support is converted into milk; provided it is the nature of the cow to convert feed into milk. If this is not the cow's nature, then the feed is converted into fat and increased weight. No system of feeding will make the cow of beef tendency convert her feed into milk. It is in this that the difference lies between dairy breeds and beef breeding.

Many admirers of Shropshire consider them the best wool and mutton sheep of any of the breeds. They are hardy, good mothers, generally produce twins, and a good flock would have at least 50 per cent in lambs. The lambs mature early and are in great demand by butchers. Shropshires should average nine to ten pounds of wool. The imported Shropshire shown in the University of Idaho flock. Note wooling of face to point of nose.

fed head an indication of superior commercial qualities, and what are they? I am not asking these questions for the purpose of calling attention to the fact that serious doubts are being cast on the value of the fashionable Shropshire as a practical farmer's sheep nor to the alleged general complaint of the butchers that the prize winning Shropshire of the day is deficient in its loin and its leg of mutton and that the proportion of fat to lean is too great to suit the public demand. My object is rather to warn the present day breeders of Southdown sheep of the great danger that they are likely to fall into unless the present tendency on the part of some Southdown judges of placing undue stress on the plumpness of wool on the face of the Southdown is discontinued.

It has been asserted by some of our most observant breeders of sheep that a large increase in the amount of wool on the face of a sheep almost certainly indicates a decrease of lean meat in the carcass of the sheep. This view is certainly supported by the decisions of the judges of the carcasses of sheep at the Southdown and other shows, where the major portion of the prize money is awarded to the carcasses of sheep which in life had moderately clean faces.

It is a point of much importance and one which is worthy of discussion by some of our eminent stockmasters.

The Difference in Breeds. There is no mystery surrounding the feeding habit of the dairy cow. It is common knowledge that a certain amount of feed is required to support the animal body. The amount varies with the individual cow. It is known that the feed consumed by the cow in excess of bodily support is converted into milk; provided it is the nature of the cow to convert feed into milk. If this is not the cow's nature, then the feed is converted into fat and increased weight. No system of feeding will make the cow of beef tendency convert her feed into milk. It is in this that the difference lies between dairy breeds and beef breeding.

## BOYS AND GIRLS TEST COWS.

A group of boys and girls in southwestern Iowa are this season taking part in a contest that ought to bear fruit in a better and more intelligent type of dairying in the near future. One hundred and seventy-two of these boys and girls are sending in to the office of the State Dairy association monthly reports covering the performance of the cows in their home dairy herds along the line of milk and butter fat production. In view of the fact that some of these youthful reporters are keeping tabs on as high as fourteen cows it is estimated that more than 500 cows are being checked up. All boys and girls between the ages of twelve and twenty are eligible for entry in the contest, which has been set for three months. Each contestant is furnished with a dairy record sheet, on which the weight of each milking is recorded by accurate scales. Twice each month a sample of the milk must be taken and tested to determine the per cent of butter fat which it contains. When ever possible the contestants furnish a small testing outfit and do the work themselves, but where testers cannot be secured the samples of milk are tested at the creamery or station where the test is made. The kinds of feed used and the amounts of each consumed are carefully recorded in order to determine the actual value of each cow as a producer. Feed schedules giving the value of the common grains and roughages are furnished, so that the cost account may be figured on the same basis. Each contestant is required to write an essay of not over 500 words describing the manner in which the work is carried on and the benefits derived, the prizes awarded being upon the thoroughness with which the testing work is done and the fullness and accuracy of the records kept. Breeders of dairy cattle and dairy supply houses have assisted by offering valuable prizes for the boys and girls who make the best showing. Three of the winners are to have their choice of a pure bred Guernsey, Jersey or Holstein bull calf, while others will receive cream separators, Babcock testers and other dairy equipment.

## HORSES VERSUS MOTORS.

As long as ten years ago it was predicted that the automobile would put the horse out of business. That this process is likely to be one covering a very long period is shown in the following figures giving the census of horse propelled vehicles and motor vehicles of one kind and another in the city of Chicago in the years 1911 and 1914: In the former year there were 40,100 one horse vehicles in Chicago, 17,040 two horse vehicles, 331 three horse rigs and 34 four horse rigs. In the same year there were 436 and 803 auto delivery trucks of less than one ton and more than one ton capacity respectively. Early in the present year the census for the four kinds of horse vehicles were in the order above given as follows: 38,905, 15,851, 229 and 17 respectively. The two sizes of motor trucks had increased to 2,448 and 1,759 respectively.

## GETTING RID OF CROWS.

When crows do not pull corn and kill little chickens it is generally considered that they do more good than harm because of the fact that they devour large numbers of beetles, caterpillars and mice. Where they do indulge in the two practices referred to an excellent method of putting a stop to their depredations is by killing several crows and hanging them up on long poles. There is something quite suggestive in the sight of a still crow at the end of a long pole, and the live ones that remain are quite likely to fight shy of the places where such crows are on exhibition. The writer has tried this method and found it very satisfactory. If the crows are too wary to sit for a shot at from twelve to fifteen rods one ought to get a bead on them at a greater distance with a good target rifle.

## A CHINCH BUG PARASITE.

An entomologist of the Kansas experiment station has discovered a parasite which lays its eggs within the eggs of the chinch bug, and it is his opinion that this parasite will ultimately mean the control of the chinch bug pest. When hatched the larvae of the parasites feed upon the contents of the eggs in which they are laid. Last season Professor McCulloch, assistant entomologist, collected fifty-one insects, and he bred out 789, of which number 512 were females. It was found that these females laid on the average from twelve to twenty-nine eggs daily. Their life period was found to run from twelve to thirty days, depending upon weather conditions; from eight to ten generations being produced.

## KILLING PLANT LICE.

One of the worst foes of plant life during the warm summer months are the different species of lice. These may be kept in check by spraying the plants or trees with either a soap or a tobacco solution. The first is made by dissolving white oil soap in water at the rate of one pound to about six gallons of water. The latter is prepared by diffusing the commercial tobacco extract preparations according to directions or by steeping a pound of tobacco leaves in four or five gallons of water. Both sprays should be applied thoroughly, care being taken to get the spray into all curled leaves and on all the lice present.
